María Jesús Vargas García

Our problem?

Is social distancing gping to reduce the COVID-19 spreading?

Intervention

- Work from home and virtual school: not all adults will work from home and we will divide the population in adults and children

Goal

- Check if these interventions will reduce the spreadiong and how it will impact the rate of infection

Non workers: unemployed, children and teenagers and old people.

9.07% unemployed, 31% children and teenagers and 20.4% old people

Workers

38.53% workers

- 59.57% of the population stays at home

- sickness rate for mask: 70%
- sickness rate for staying at home: 78%
